## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Drawings***

2. Figure 4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

3. The disclosure is objected to because of the following informalities: on page 26, under Brief Description of the Drawings, in Fig. 4, "the beam light beam trace" should be changed to --the light beam trace--. On page 27, under Detailed Description of the Invention, last line of first paragraph, "(26)" should be changed to --(2c)--.

Appropriate correction is required.

***Claim Objections***

4. Claim 10 is objected to because of the following informalities: there is lack of antecedent basis for "said bell shaped neck" in line 3. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 6-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Bergman et al. [US 5,610,469].

Regarding claim 6, Bergman et al. discloses a lamp having an arc tube [12] with walls and made of quartz glass and filled with xenon and mercury metal halide pellet inside, a gas tight outer envelope [14] with walls, the outer envelope being made of glass [coating 50] preventing UV light, the arc tube [12] and the outer envelope [14] defining a vacuum space [hermetically sealed], wherein the outer envelope [14] having a portion [16] disposed proximate to the arc tube [12] and their walls being generally parallel (figures 1-2, column 3 lines 14-67, column 4 lines 1-67).

Regarding claim 7 and 8, Bergman et al. discloses the outer envelope having a ball shaped portion and an elliptically shaped portion (figures 1-2).

Art Unit: 2875

Regarding claim 9, Bergman et al. discloses the outer envelope portion having a cylindrical portion [22] (figure 1).

Regarding claim 10, Bergman et al. discloses the arc tube having a neck portion [26, 32], and being ball shaped [32] and outer diameter, and said the outer diameter and the outer envelope [14] being sealed together (figure 1).

Regarding claim 11, Bergman et al. discloses the neck portion [26] and the outer envelope [14] formed a gas tight seal [hermetically sealed] (figure 1).

Regarding claim 12, Bergman et al. discloses a cap [28], with the lamp attached to the cap [28] (figure 1).

***Allowable Subject Matter***

7. Claims 13-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. The following is a statement of reasons for the indication of allowable subject matter:

Claim 13 recites a plurality of poles formed on the cap, and a hop having a plurality of holes with said holes matching the plurality of poles, which are not disclosed or suggested by the prior of record.

Claims 14 and 15 are dependent on claim 13.

Art Unit: 2875

Claim 16 recites the cap comprises a central portion having a depressed area with the arc lamp projecting into said depressed area, which are not disclosed or suggested by the prior of record.

### ***Response to Amendment***

9. Applicant's amendments and arguments with respect to new claims 6-16 have been considered but are moot in view of the new ground(s) of rejection. A new reference, Bergman et al. [US 5,610,469] is applied.

### ***Conclusion***

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
